

INTELLIGENCE THAT DRIVES THE FUTURE

Exceptional beauty and a pure driving experience

BAIC
X75

EXTERIOR DESIGN

Panoramic Sunroof

A class-leading 1320x 850mm premium glass canopy that floods the cabin with natural light. It offers an immersive and cinematic visual experience, providing all passengers with an expansive, wide-angle view of the sky while enhancing the cabin's open, airy, and high-end feel.

Tyres 19-inch wheels

The top-grade BAIC X75 comes equipped with tyres on 19-inch alloy wheels, delivering a more premium stance with improved stability, confident handling, and a comfortable ride quality for enhanced driving performance.

LED Taillights

Modern LED taillights provide bright and fast-responding illumination for improved rear visibility and safety. Their sleek design enhances the BAIC X7's rear styling, giving it a bold and premium look on the road.

LED Headlights

Stylish LED headlights deliver powerful illumination for enhanced visibility and driving confidence. Their sleek design complements the BAIC X75 modern exterior, creating a distinctive and premium presence on the road.

Hidden Smart Door Handles

Sleek flush-mounted door handles that automatically extend when the vehicle is unlocked and retract when locked. This design improves aerodynamics while giving the BAIC X75 a clean, modern, and premium exterior appearance.

INTERIOR DESIGN

Steering Wheel

Premium multi-function steering wheel with full touch controls, mechanical key integration, and 4-way adjustment for a comfortable and personalized driving position. Finished in soft-touch microfiber leather for a refined feel.

12.3-inch Center Touchscreen

Sleek flush-mounted door handles that automatically extend when the vehicle is unlocked and retract when locked. This design improves aerodynamics while giving the BAIC X7 a clean, modern, and premium exterior appearance.

Dynamic atmosphere lamp

64-color atmosphere lamp creates an intelligent cabin atmosphere. Atmosphere lamp changes with the music rhythm to improve the customer's sense of participation and integration which highlight the sense of technology and brand personality.

Transmission (7-Speed DCT380)

The BAIC X75 is equipped with a 7-speed Dual Clutch Transmission (DCT380) that delivers smooth and quick gear changes for a more responsive and comfortable driving experience. It enhances driving efficiency and ensures better performance in both city traffic and highway conditions.

Intelligent Three-Screen Interaction

Seamless integration between the instrument cluster, central screen, and infotainment system, allowing smooth data sharing and a more connected driving experience.

Premium Seat Comfort Architecture

Massage, heating and ventilation: Provides complete year-round comfort and fatigue relief by combining active airflow, soothing warmth, and targeted muscle relaxation directly within the seat structure.

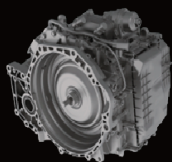

Intelligent Three-Screen Interaction

The Penetrated Air Outlet is beautifully designed, allowing you to enjoy the comfortable temperature and free regulation while feeling the exquisite design, allowing you to enjoy the best comfort at every position in the car.

PERFORMANCE

ENGINE

39.2% thermal efficiency
Large flow VGT supercharger
Miller cycle
350bar+high tumble ratio
Cylinder block and head split cooling
21 noise-reducing black technologies

TRANSMISSION

Golden combination training
High-performance synchronizer
High-efficiency dual-pump system
Bistable electronic shift

BAIC X75

Dynamic parameter index

0-100km:	9.87
30-70km/h:	3.89
60-100km/h:	5.3
80-120km/h:	6.72

Fuel consumption index

WLTC:	7.39(7.7)
60km/h:	4.46
90km/h:	5.67
120km/h:	6.72

INTERACTIVE EXPERIENCE

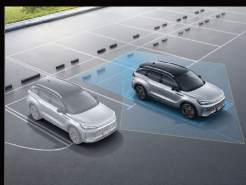

Experience

- The home page of the central control system adopts split screen design
- Custom widget card content
- Dynamic presentation of vehicle common page
- Dynamic display of ADAS functions
- Use dynamic form to display ADAS function, and play dynamic effect when turn on the switch which is clear and easy to understand.

Comfortable

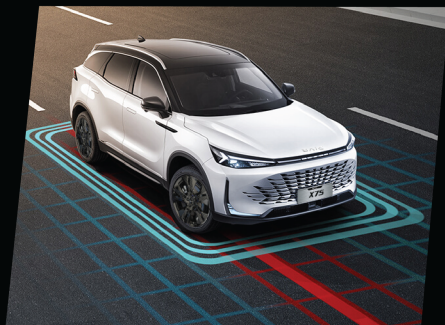

- A sophisticated and intelligent experience that combines the highest levels of comfort with advanced technology, featuring a design focused on passengers' needs.
- It offers luxurious seats inspired by first-class cabins, providing exceptional comfort and optimal support, making every journey an experience of absolute luxury.
- Eight-point massage system for front and rear seats
- Intelligent voice control of air conditioning and manual rear armrest switch
The temperature in the cabin can drop by 20 °C in 10 minutes
- Ventilation/heating can be controlled by physical switch (only the rear row is equipped with physical switch)/screen button control /voice control
- Intelligent double-zone air conditioner
- Comprehensive air purification function
- Variety of air-conditioning comfort options
Rear multifunction armrest

Automatic & remote parking

An intelligent parking system that effortlessly covers 158 distinct scenarios across 5 major terrains, giving even rookie drivers total peace of mind. It can complete precise parking maneuvers in as little as 20 seconds, making it exceptionally easy to navigate and secure the narrowest parking spaces without any hassle.

PETROMIN BAIC

Lane Departure Warning

An advanced safety feature engineered to minimize the risk of unintended lane departures on highways, expressways, and main roads. By delivering both visual and auditory alerts the moment you drift, it keeps you securely on track and enhances highway driving confidence.

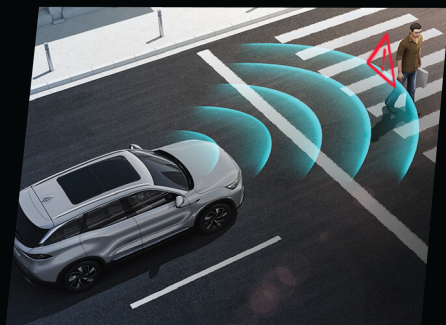

High Beam Assist

Intelligently switches between high and low beams automatically to avoid dazzling oncoming drivers. By dynamically adjusting your lighting to nighttime traffic, it actively promotes safer driving conditions for everyone on the road.

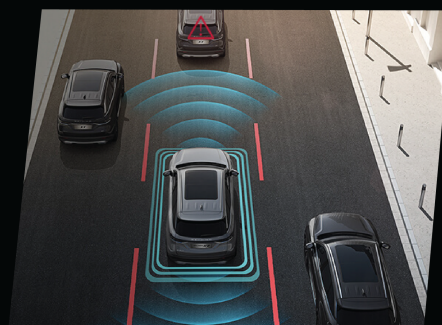

Forward Collision Warning

Constantly monitors the road ahead and alerts the driver through auditory and visual warnings if the distance to the preceding vehicle becomes dangerously close. By providing these critical reaction windows, it helps the driver maintain a safe distance and actively works to prevent rear-end collisions.

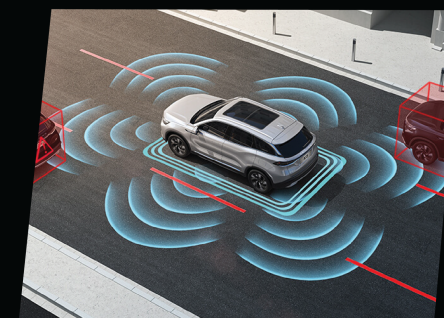

Autonomous Emergency Braking

Actively detects pedestrians or vehicles directly in front of the car and triggers an alarm if there is an immediate risk of collision. Offering advanced safety control, it ensures a secure driving buffer and helps put an end to dangerous tailgating.

Integrated Adaptive Cruise Control

Intelligently adapts to your preset speed and automatically switches targets to match traffic flow. By taking the physical load off your feet during long journeys, it provides a much more relaxed and effortless driving experience.

Integrated Cruise Assist

Combines intelligent vehicle-following and precise lane-centering technologies to seamlessly guide your journey. By handling routine steering, braking, and acceleration adjustments, it significantly reduces driver workload and fatigue during extended highway travel.
